Profile

Full-stack Developer and Solutions Architect with expertise in diverse range of technologies within multiple industry settings. Demonstrated success managing Networking, Software Design, Quality Assurance, Product Development and Business critical timelines. Well-organized, results oriented individual with proven ability to implement standards, procedures and processes that improve business functionality. Solid management skills, capable of leading and motivating individuals to maximize levels of productivity. While forming cohesive team environments. Exceptional communicator, focused on building strong client relationships.

Experience

LGD Communications

Senior Web Developer

2014-Present

Responsible for leading multi-team projects to facilitate business and engineering needs in a zero-downtime environment. Designed and orchestrated company's hosting and development infrastructure. Using Open Source technologies.

Internap Network Services, Inc.

Full-Stack Developer

2013-2014

Designed portal and public-facing SOAP APIs for integration with new cloud based Cloud product suite.

The Rubicon Project

Software Engineer

2012-2013

Assisted in the design/development of a PHP/SQL based reporting engine designed to collate and report on the hundreds of billions of ads the company serves each month. Continues to function as the authoritative source of financial and business-related statistics for Rubicon and all of its clients.
